Bank of America Processing Center

Owner – Bank of America

Location – Plano, Texas

Contract Value - \$600,000

Completion Date – January 2011

As a subcontractor to Balfour Beatty, John Burns Construction of Texas, Inc. worked closely with onsite Balfour Beatty personnel ensuring open communication and quality construction. This project involved the renovation of an existing building and site. The data, water, sanitary sewer and storm sewer service needs increased and required the construction of a totally new utility system to the existing building.

- Installation of 1,500 linear feet of concrete encased duct bank was needed to reroute communications.
- 1,000 linear feet of water, 900 linear feet of sanitary sewer and 1,300 linear feet of storm sewer were constructed to complete the wet utilities.
- Installation of 6 communication and 7 sanitary manholes were also required at various location on their respective lines.
